Software Developer with a passion for Front End Web Development. With a detail-oriented approach to solving design and development problems, I focus on adding value to any team that I join. I utilize full-stack software solutions primarily focused on Javascript, React, Node.js, and MongoDB to create dynamic, high-quality, user-focused solutions that deliver the best experience using the highest quality modern development methodology.

LANGUAGES		FRAMEWORKS		DATABASES	TOOLS
• JavaScript	• HTML5/CSS3	• Bootstrap	• Tailwind CSS	• MySQL	• Git
• React	• NodeJS	• Express	• jQuery	• MongoDB	• VS Code

PROJECT EXPERIENCE

PR Manager — Pull Requests Made Easy — https://pr-manager.vercel.app

- Fully responsive Front End application written in React.
- Designed to allow repository owners and contributors to conform to a style guide for writing Pull Requests.
- Drag and drop interface allows quick reorganization of included sections.

WORK EXPERIENCE

Curriculum Writer, Chongqing, China, May 2018 - January 2020
- Wrote dozens of articles across 32 different publications which have been adapted and are used by thousands of students in hundreds of classrooms across China.
- Shaped and implemented focused English lessons specifically designed for use with both small and large classroom group sizes.
- Collaborated with dozens of members across multiple teams to best organize, develop and publish material.

English Teacher, Chongqing, China, September 2010 - May 2018
- Lead planning, implementation and instruction of English lessons to groups of more than 30 students.
- Collaborated with assistant teachers to improve student engagement and interest.
- Developed and modified college-level business English courses for use with English major students.

EDUCATION

General Assembly, Software Engineering Bootcamp

International Academy of Design and Technology, A.S. Business Management
